Seattle, WA | 971-806-6880 | IXWinter25@gmail.com | linkedin.com/in/ian-xia

EDUCATION

University of Washington

Seattle, WA

Bachelor of Science in Computer Science, Minor in Statistics GPA: 3.82/4.00

Expected Graduation: June 2028

- **Relevant Coursework:** Foundations of Computing I & II, Software Design & Implementation, Data Structures & Parallelism, Matrix Algebra, Advanced Multivariable Calculus, Statistical Methods in Engineering & Science
- **Planned Coursework:** Algorithms, Systems Programming, Intro to Distributed Systems, Machine Learning, Intro to Operating Systems, Software Engineering, Intro to Data Management
- **Honors:** Dean's List (Autumn, Winter, Spring 2025–2026), Annual Dean's List

TECHNICAL SKILLS

Skills: Java, Python

AI/ML: RAG pipelines, LLM agent orchestration, embedding-based retrieval, LLM judge evaluations

Tools: Git, GitHub

EXPERIENCE

OHSU DICE Biomedical Informatics Intern

Portland, OR

Biomedical Informatics & Data Science Intern

June 2026 – August 2026

- Architected a 3-agent (Curator → Reviewer → QA) RAG pipeline for gene-pathway curation, integrating literature retrieval, full-text extraction, and evidence-driven review/QA feedback loops into a single reproducible curation workflow.
- Redesigning literature retrieval with a PubMed query → cross-encoder rerank → LLM-judge design, raising mean relevance 5.1→7.8 out of 10 and annotatability 52%→89% across a benchmark gene set.
- Built a cold-start pathway-prediction module for unannotated genes, using protein-interaction data (BioGRID, IntAct) and statistical enrichment (binomial test + FDR correction) to extend retrieval coverage to genes with no existing pathway data.

Seattle AI X Business

Seattle, WA

Website Developer

Jan 2026 – May 2026

- Developed a full-stack web application (Next.js, React, TypeScript, Tailwind CSS) using AI-assisted coding workflows as part of a two-person engineering team
- Collaborated through GitHub with pull requests and branch-based workflows; contributed to product planning and feature-design discussions in an early-stage startup environment

PROJECTS

AI Calendar Assistant

FastAPI, SQLAlchemy, SQLite, React

- Built a REST API (FastAPI, SQLAlchemy, SQLite) with full CRUD and Pydantic validation, and integrated Claude's tool-use API to enable natural-language event management via an agentic tool-calling loop; built a React frontend to interact with it.

Personal Website

HTML, CSS

- Created a personal portfolio to showcase work and practice front-end development.

LEADERSHIP & ACTIVITIES

Boys Nation Senator

Washington, D.C.

The American Legion

July 2024

- Selected as one of two Oregon representatives based on leadership excellence
- Drafted, debated, and voted on policy proposals in a simulated U.S. Senate
- Met with U.S. Senators and Representatives to gain firsthand insight into the federal legislative process

Swim Team Captain

Portland, OR

Jesuit High School

March 2025

- Led JV and Varsity teams, organizing events to strengthen team culture
- Served as liaison between athletes and coaches, communicating team needs and feedback to coaching staff
